RS Series Solution Level Retail Scale

RS Series Applications and Features

Advanced in application and features but still easy to use. With its compact design and integrated printer the RS Series can operate as a scale, electronic cash register, printer and ECR management tool, eliminating the need for multiple systems and saving counter space.

The clear structured backlit display, the user friendly quick response keyboard, and innovative interfaces make the RS Series not only a user-friendly, high performance scale but also an attractive business solution to better manage your business.

RS Series can be customised to exactly fit your needs.

RS Series Key Applications

Retail is diverse and fascinating, with customers, markets and opportunities changing constantly. With the RS Series we developed applications that help you to discover new ways of working.

The RS Series' offers multiple applications normally only found in high-end scales. This means that the RS can provide solutions to a wide range of requirements in a variety of retail segments at a very economical price. Listed below are just a few examples:

Key Features of the RS Series

Application	Benefit
Report Printing <ul style="list-style-type: none"> • Total Sales reports • PLU reports • Group reports • Vendor reports • Cash drawer reports • Daily, weekly, monthly, yearly reports. 	<p>RS Series Reports give you the opportunity to analyse your sales, optimise your product range and profitability.</p> <p>You can also use the included PC Software and transfer the data to your PC easily and analyse it there.</p>
Communication <ul style="list-style-type: none"> • Up to ten RS Series Scales can be joined in a network • Easy integration into networks via worldwide Ethernet standard. • Floating Vendor • Networking Hardware included in all units, ready to be activated at any time. • RS Series' scale sub-networks can be linked via routers and communicate with the backoffice PC 	<p>RS Series Networking allows your staff to work faster and provide better services by using the floating vendor function. Floating Vendor simply allows you to serve one customer while adding the products in the customer's account on different scales.</p> <p>Optimised service by the Floating Vendor Networking application simply means higher revenues for your business.</p>
Operational & Data Entry Settings <ul style="list-style-type: none"> • Basket function • Manual tares • Semi-automatic Tare that stays all day • PLU related tares 	<p>The RS Series Tare applications allow many different tare operations that are needed every day whether on open markets, at salad bars or in a supermarket.</p> <p>The Basket function is an application often requested in the pick it yourself farmer business. RS Series scales can recall up to 999 different tares and identify the correct customer easily.</p> <p>Use the PC software to easily manage all you scale settings and backup all scale data and settings.</p>
